04

Optimized production

Mundimold is a firm specialized in the design and manufacture of high precision metallic moulds for thermoplastic injection and in the provision of global solutions for the packaging industry, particularly for boxes/crates such as bottle crates, agricultural boxes, industrial boxes.. pallets, top quality accessories and big boxes.

We boast 50 years of experience in the sector and more than 1000 moulds produced and we have gained the trust of important international firms who we collaborate with in product enhancement.

Mundimold can produce high precision, single or multi-cavity,

rapid cycle, high performance moulds of up to 80 tons. At the same time Mundimold is able to develop any exclusive, customized project with a commitment in terms of delivery time and injection mould cycles guaranteed in writing.

Constant improvement in our production processes, respect toward the environment and the search for quality in our products has resulted in the award to Mundimold of the Quality Certification ISO 9001:2000 ND Environmental Certification ISO 14001:2004.
